Gerresheimer Shares

Vision – Mission – Values

Our Vision
Gerresheimer will become the leading global partner for enabling solutions that improve health and well being.

Our Mission
We will achieve our vision by:

- Understanding our customers and providing them with solutions to both their present and future needs.
- Leveraging our competence and technological leadership.
- Living our commitment to excellent quality and continuous innovation.
- Expanding our global reach and creating profitable and sustainable growth.

Our Values
- Integrity
- Responsibility

Sustainability at Gerresheimer

Responsibility toward the environment
As a manufacturing enterprise that consumes large amounts of energy to produce its products, especially for the manufacture of glass containers, our responsibility toward the environment has for many years centered on efficient energy consumption and the avoidance of emissions, particularly CO2e emissions. Consequently, since the financial year 2008, we have set a CO2e emissions target, which is stated in our Annual Report and, in so doing, by acting as one global team, we are ensuring both the present and future needs of our customers and providing them with solutions that improve health and well-being.

Clear improvement in CO2e emissions relative to revenues

- 2008: 2.15
- 2010: 2.05
- 2012: 1.95
- 2014: 1.90
- 2016: 1.86
- 2018: 1.80

1 Excluding the Life Science Research Division (sold as of October 31, 2016).

- Early work experience in more than 15 different professions
- Internships

Profile SHORT
Gerresheimer is a leading global partner to the pharma and healthcare industry. With our specialty glass and plastic products, we contribute to health and well-being. We have worldwide operations and about 10,000 employees manufacturing our products in local markets, close to our customers. With plants in Europe, North America, South America and Asia, we generate close apperception of our customers. Our product portfolio includes pharmaceutical packaging and primary & secondary plastic containers, safety systems as well as packaging for the cosmetics industry.

Our Divisions

Plastics & Devices
The product portfolio of the Plastics & Devices Division includes complete, customer-specific products for the simple and safe administration of medicines: Insulin pens, inhalers, micro pumps, prefillable syringes, injection vials, ampoules, and containers for liquid and solid medicines with closure and safety systems as well as packaging for the cosmetics industry.

Primary Packaging Glass
The Primary Packaging Glass Division produces glass primary packaging for medicines and cosmetics, such as pharma jars, ampoules, injection vials, cartridges, perfume flacons and cream jars.

Advanced Technologies
With the acquisition of the Swiss technology company SenseMediCal, we have laid the groundwork for our new division, which will be dedicated to developing and producing intelligent drug delivery systems.

Our Customers
Gerresheimer has developed longstanding relationships with customers of all sizes around the world. Our customer base includes both international and national pharmaceutical companies, American pharma as well as companies in the diagnostic and medical technology industries. We also supply numerous cosmetic customers with our products.
