

Environmental objectives and policy of Gerresheimer Vaerloese:

Working at a continuously reduction of the company's environmental impact in relation to our surroundings and society and ensure a satisfactory working environment.

Environmental policies:

1. Minimise the consumption of energy in proportion to the volume of output.
2. Observe the environmental laws in force and co-operate actively with the authorities in relation to environmental questions.
3. Be open about the company's environmental impact to the employees and the outside world.
4. Motivate the employees –and the suppliers working with the company- to act up to all demands and guidelines as a precaution against the surrounding environment.
5. Motivate the employees to point out essential risks in the activity of the company to the management.
6. Improve the environmental contribution with a view to reducing the environmental impact to a level corresponding to a financial practicable use of the best usable technology and co-operate with the suppliers about this subject. Including being open about emission of CO² and future goals. This is done by participating in the Carbon Disclosure Project.
7. Provide the customers with proper guidance on essential environmental aspects in relation to handling, use and disposal of the products.
8. Minimise and prevent the risk of damage of employees and machines by a purposive effort to prevent the arisen of the damage.
9. Insure the company against the risks, which are found essential by the management.
10. Ensure a safe working environment.
11. Comply with ISO 14001.
