INNOVATIVE SOLUTIONS

Droppers – pin-pointed application of precious formulations

Dropper pipettes allow for the targeted dosage and application of skincare, haircare, nail and make-up products, especially for low-viscosity formulations.

Our latest innovative cosmetic creation, a customizable dropper, is a combination of our capabilities in tubular glass and plastic packaging. With the market for highly effective ingredients growing rapidly, we joined forces with all divisions to offer one-stop-shop solutions with different options in bulb, collar and pipette. Contact us for further information on colors, materials, length and tip variations.

To complete the set, we developed a standard moulded glass bottle made of PCR (post-consumer recycled) glass that is a perfect fit for the dropper. For a more pharmaceutical style, we also offer dropper bottles in amber or blue glass.

CAPABILITIES

Beautiful as porcelain

Gerresheimer is one of the leading opal glass manufacturers in Europe. We have now invested in several technological advancements in our new all-electric opal glass furnace at Momignies, Belgium, to respond to stricter quality standards expected by our customers.

Opal glass is an opaque, milky-white glass. The porcelain-like appearance reflects timeless elegance and the notion of luxurious design. Notably, opal glass combines both protective and aesthetic aspects. It is therefore the perfect choice for packaging

high-value cosmetics or cosmeceuticals and medical skincare products where protection of precious formulations is needed.

Due to the appealing appearance of opal glass, it is also very popular for premium spirits and food or decorative home fragrance bottles.

SUSTAINABILITY

Gerresheimer contributes to stop the flow of plastic into the ocean

Every year, millions of tons of plastic waste are dumped into our oceans. Here at Gerresheimer, we want to help regenerate ocean-bound plastic.

We have therefore established a cooperation with a company whose business model is to stop plastic from ending up in the oceans.

We want to be committed to returning plastic waste to the recycling process by offering this kind of material. It is 100% PCR, mechanically recycled material known as rPET.

Since less energy is needed for recycling, the CO₂ impact is significantly reduced. Consequently, recycling saves both raw materials, energy and our environment.

NEW LAUNCH

Opal glass packaging underlines the notion of luxury for new German skincare brand

The young German luxury skincare brand OJESH has recently launched its new Pro Regeneration cream range, consisting of two face creams and one eye cream. The 50ml and 15ml jars in opal glass perfectly reflect the luxurious formulations. The look of the jars convey high-value and a clean image, while protecting the highly efficient natural ingredients of the product.

NEW LAUNCH

Isdinceutics Essential Cleansing by ISDIN – from PCR plastics to elegant and sophisticated packaging

We proudly present our most recent post-consumer recycled packaging solution made for our partner ISDIN, a Spanish leading company in European dermocosmetics.

ISDIN has selected an rPET packaging solution for its most innovative Essential Cleansing product: oil to milk formula with 85% natural-origin ingredients.

This is a good example of how a product with an incredible finish is achieved through successful collaboration with our partners. ISDIN packaging design is fantastic and a lot of hard work goes into it (correct color selection, raw materials, flawless finish, lacquering, silk screen, hot stamping).

The Essential Cleansing product boasts an elegant and sustainable design, with a standard bottle made from post-consumer recycled plastic. With the high PCR share in the plastic, both carbon footprint and use of virgin raw materials are reduced.

We can't wait to see you
at our 2022 exhibitions!

May 24–26, 2022
PCD in Milan, Italy

May 31–June 1, 2022
Luxe Pack Edition Spéciale in Paris,
France

June 1–2, 2022
CosmeticBusiness in Munich,
Germany

June 29–30, 2022
PCD in Paris, France

October 3–5, 2022
Luxe Pack Monaco
