gerresheimer
innovating for a better life

Easy patient home use

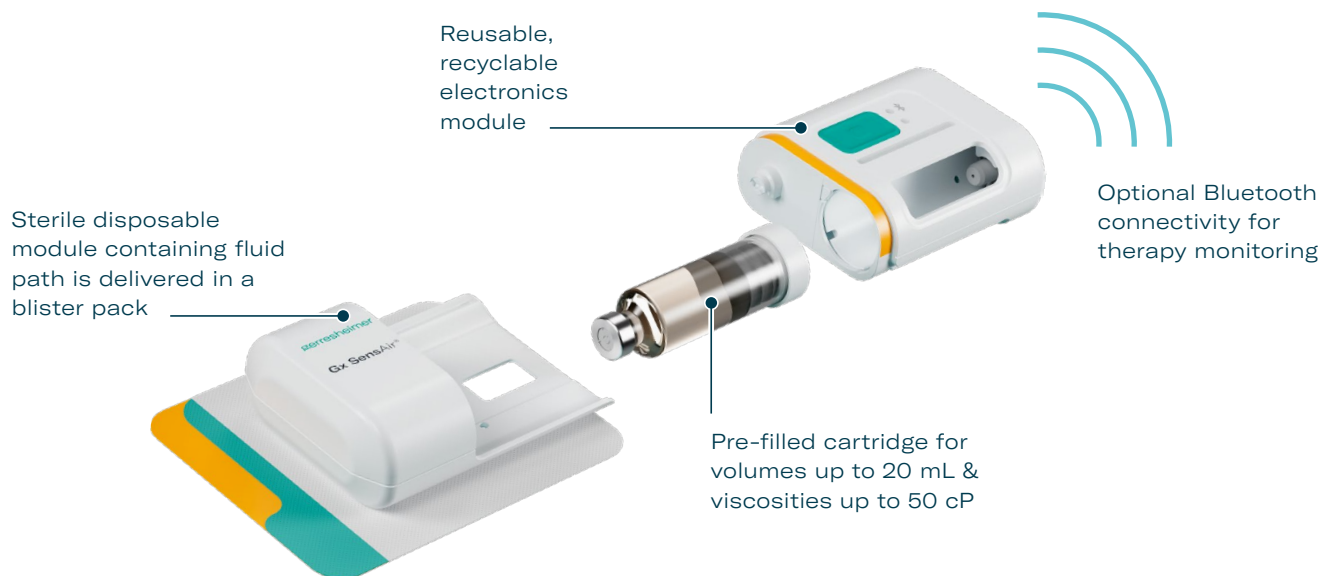

- On-body detection with automatic needle insertion and protection shield
- Click-together assembly and simple usage with one-button operation, audible signals, light indicator and injection progress window
- Lightweight, compact design enables the patient to move freely

Ecodesign concept

- Reduced CO₂ emissions through the supply chain as the drug cartridge can be refrigerated separately
- Less waste as all electronics are housed in a reusable module which can then be recycled
- No need to sterilize the reusable module, which reduces water and energy consumption

Quick customization from a full-service partner

Our adaptable platform concept enables quick tailoring to different therapeutic areas and medicines. This reduces development risk and time-to-market for our customers.

We are experts in development, manufacturing, and regulatory submission. We work closely with our customers to create combination products that support patients.
