

Gx[®] Elite Glass Vials

Because sometimes you need
the Perfect Type I Borosilicate Vial

gerresheimer.com

gerresheimer
innovating for a better life

Best in class vial by innovation in process design and technology

Gerresheimer is a world technology leader in Pharma glass packaging. Gx® Elite vials are the high end solution for the most demanding customer products and markets, with no change to Type I Borosilicate glass chemistry to allow for an easy transition for our customers. Gx® Elite advantages are a result of combining a quality by design approach for the product and optimization of our converting process to deliver an industry leading solution with improved patient safety. Gerresheimer offers the Elite platform in clear and amber glass in 2 ml / 2R to 30 ml / 30R sizes.

Best in class dimensions
Process capability indices ≥ 1.67 Cpk for CCI features with options for customization

Improved strength
Minimum 2x – 4x standard Type I glass

Same glass chemistry as Type I
No need to refile with regulatory bodies

Continued protection
Cell packed for protection through supply chain

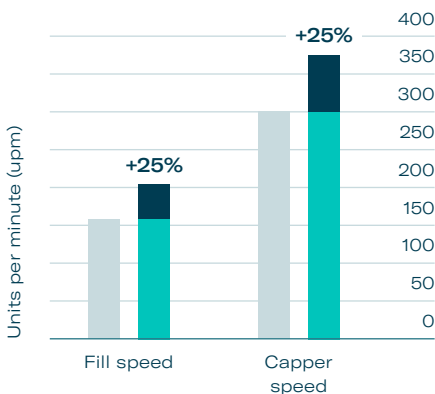

Cosmetically flawless
Zero visible defects, scratches, contamination or particles (< 100 microns)

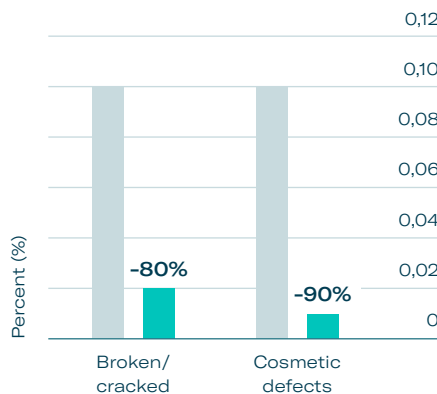

Efficient processing
Simplified fill & finish process through Gx® Ready-To-Fill (RTF) quality

Machine speed

Percentage of breakage/defects

Financial Benefits

- Easy transition from current Type I glass, faster to market
- Reduced filling line breakage and finished product rejects (80% reduction) leads to substantial lowered costs
- Meets all worldwide regulatory requirements
- Faster line performance by ability to meet demands of high speed lines = lower costs, up to 25% higher speeds
- Reduced risk of market rejections and recalls for container integrity
- Increased patient safety with more durable and reliable packaging
